INTRODUCTION

Totalum is a indigenous aluminium metal, glass and Suspended ceiling contractor incorporated with RC No 645269 on October 1998 to boost the ever growing dynamic aluminium industry, with offices/workshops in Lagos and Abuja. Our head office situated in Lagos, Nigeria. This gives us the edge to deliver to any part of Nigeria.

Our Objectives is to create exceptional value, service and opportunities for corporate organization and individuals desired to work with us. We want to be synonymous with excellence in all aspects of aluminium, metal and glass works.

In 2013, we formed international alliances with Aeon Glass in Qingdao, China and China Glass. This gives us the rare chance of being one of the the largest importers of glass and aluminium composite panels in various sizes and thicknesses.

To achieve this set objectives, we utilize effective information management systems for data processing to study designs. We also employ effective site supervision project management and training of our mmanagers.

We have well-structured management and tracking systems for effective delivery. We act with integrity and comply with all architectural and after sales service is unparalleled. Please avail yourself of the unique opportunity offered to do business with us.

The main teams are:

Administration team

Factory team

Installation team.

The administration team: are divided into groups, containing engineers and technicians, experts in metallic structures, design and drawings. Sales/Marketing group with mission to bring new project/client to the company.

The factory team: contains the cutting, assembly and Glazing groups.

Installation team: is formed by fixation group, isolation group and check up, control, trial and settings group. It is headed by an architect whose responsibility is to monitor the neatness of cut edges, compliances with specifications and cross with drawings given by the client.

Working with global suppliers and manufacturers known to be pioneers in their domains backed with over 15years of experience and well trained personnel made **TOTALUM** well established in the industry.

ALUMINIUM WORKS

This Division is one the core business who handles all Aluminium related jobs. Various arrangements with a list of our global suppliers of glass and its accessories was added to our profound experience in order to permit TOTALUM to play a leading role in different kinds of jobs

GLASS WORKS

This Division handles all our glass works. As a leading stockiest of All sizes, colours and various thicknesses of glass, we are delighted To let you know that TOTALUM is the best when it comes to glass handling and designs.

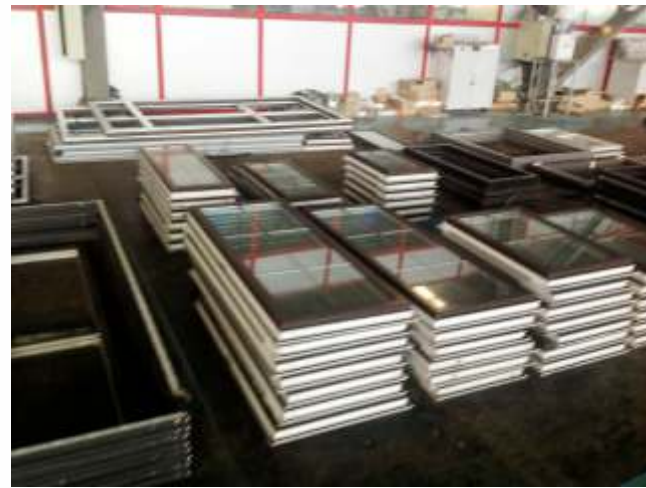

Totalum is equipped to accomplish very complex systems and profile for the curtain glass.

OUR PARTNERS

OUR STOCK

We have constant touch with over manufacturers locally and overseas. This gives us an edge over other in our delivery time. We have storage Facilities with different materials at every point in time. This we volunteer for your inspection at our Lagos office that you can be convinced at the level of our readiness.

EQUIPMENT & MACHINES

In an aim to have the highest precision and quick delivery the cutting and milling machines are CNC model (computerized numerical control machines). The best quality and services are provided, thanks to the high technology followed by TOTALUM . This we upgrade from time to time.

The screwing machine is air controlled for quick finishing. The workshop is powered by 2 nos 40Kva Generators serving as back ups to each other. Concerning the work on site, each team has its own equipment and truck to convey them to site with their finished products for installation.

HSE POLICY

HSE POLICY

Maintaining excellence in the safety of the work being done is a primary requirement not only for the well being of the personnel engaged in the construction works, and also for the benefit that accrue through higher morale at work place and better output from the staffs.

It is for this reason as a safety programme is unformulated.

SCOPE

To prepare a safety programme to the company with specific requirements of the main contractor's project safety plan.

PURPOSE

- 1) Elimination of pain resulting from accident promotion of maximum efficiency through safe work methods and conditions.
- 2) Reduce indirect adverse effects arising from accidents.
- 3) To implement safety programs at construction site as contract.

SAFETY TRAINING

Site safety conditions depends on operators training in the correct and safe execution of the site activities.

The key personnel at the office and site are periodically trained.

International health and safety standards.

Company's safety procedures

Accident Prevention

Use of safety personnel protective equipment

TRAINING ON SITE

All site personnel are made aware of safety needs in the course of dedicated meetings held by qualified HSE people.

Site conveys are also are conducted to detect potential risk and provide accident prevention measures.

Safety meetings are organized for the prevention of the most frequent accidents.
